Re: Rye Park Wind Project Application – Application Number 10-0223

Attention: Executive Director, Resources Assessment & Business Systems

I object to this project..

My name is Deann Perceval, I am pleased to have this opportunity to make a submission in response to the Rye Park Wind Turbine Project form Trustpower.

I have lived in Blakney Creek all my life. My husband and I with our two teenage children have built and lived in our family home at 1568 Cooks Hill Road Yass, since 2004.

Our family home faces North with turbines numbered 96 97 98 99 and 101 directly in view, with many more turbines running to the West. Also, we have turbines 102 ,103, & 104 to our East all within 3 to 4 kms from our home.

Attachment 1: Trustpowers view of the turbines from the road showing the hills to the North of our house, (please note we built our house facing to the North to take in the views) the scale of the height of the Wind Turbines Trustpower would have us believe in their landscape montages.

Attachment 2: The same direction showing the same hills with more of a accurate view of that the 157 meter turbines will look like.

Note in Trustpowers montage (Attachment 1) the Wind monitor tower which was erected in 2008 located very close to Turbine No 98, is not shown in any of their montages. The Wind Monitor Tower is 68 metres in height which if shown would show that Trustpowers montages are incorrect and deceiving they would like us to believe our visual aspect will not be that BAD..

Attachment 3 – This montage was kindly supplied to me personally by Andy Homewood, Green Bean Design Landscape Architects. Mr Homewood was contracted by Epuron/Trustpower to present their landscape montages. Mr Homewood has shown me the correct height of the wind Monitoring Tower – drawn in at 68 meters height. In Trustpowers montages they clearly don't show the correct height compared to the Wind Monitor.

I as you as the team leader in your position in assessing this project, :”why have Trustpower chosen to deceive both the community of Yass-Rye Park and yourself as the NSW Department of Planning in the visual aspects of this project”.. which after I have pointed out to them at numerous public meeting where they have had their montages on display, and they have had 2 years to correct and reflect the correct montages in their application to you.

It disappoints me greatly to see in their current development application to you that they are still using their deceitful/incorrect montages..

Kindest Regards

Deann Perceval
