Re: Rye Park Wind Project Application – Application Number 10-0223

Attention: Executive Director, Resources Assessment & Business Systems

I object to this project..

My name is Greg Perceval, I am pleased to have this opportunity to make a submission in response to the Rye Park Wind Turbine Project application from Trustpower.

Trustpower's process in producing maps for this project needs to be reviewed and made consistent as the maps they have supplied to you in their application are misleading and don't give a true reflection of the numbers of residence in the Rye Park area who this project will effect.

The map Trustpower had enlarged at their office in Yass showing the 2 km radius around the turbines did not have Max and Shojie Britton's house which is located on the corner of Cooks Hill Road and Dalton/Rye Park Road. This house is situated well within the 2 kms and it is a worry to me how many other property owners have been missed off their application.

Even after Trustpower have had 2 years to update their maps and correctly reflect the Rye Park residents within 2 kms they have not done so. When Trustpower have been questioned about my house at which is 3 kms away from the nearest turbine to our North, (turbine numbers 96, 97,98 99 & 101 all within 3 to 3.5kms ) they seem very disinterested in talking to us. I am very angry and stressed to the little amount of consultation Trustpower has made with the residents in this area...I feel they are just doing the minimal amount of consulting just to get this ticked off and get their development through..

I remain the right to add additional information to this submission at a later date.
