

WEST DAPTO URBAN RELEASE AREA and ADJACENT GROWTH AREAS

Proposed water and wastewater services

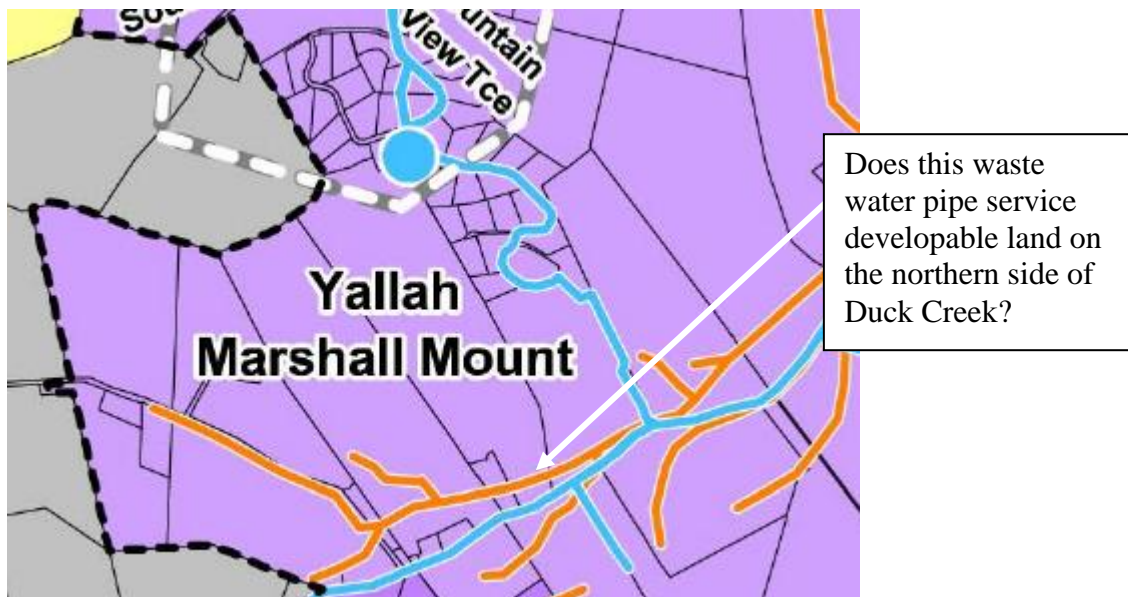

We are writing to comment on the Environmental Assessment of the proposed water and waste water services for West Dapto Urban Release Area and Adjacent Growth Areas.

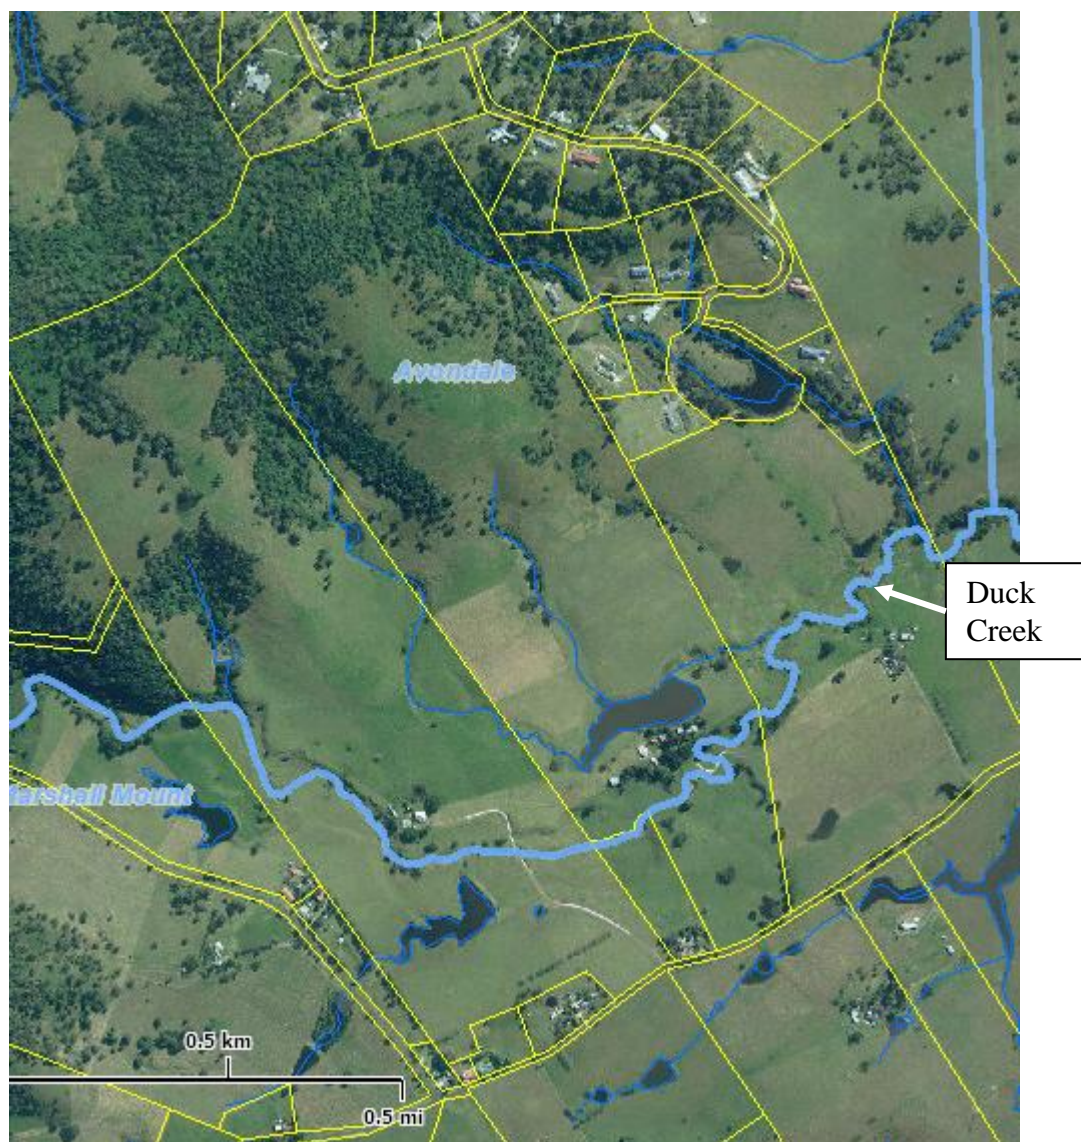

In particular we are interested in the specific trunk infrastructure that is proposed to be located on our property 386 Marshall Mount Road, Marshall Mount.

The proposed waste water pipeline shown on page 2 of the WDURA Fact Sheet, dated May 2011 is indicated to be located near the southern boundary of our property, on the southern side of Duck Creek. We are concerned that this location fails to service developable land located on the northern side of Duck Creek.

We think extending this pipeline to North Marshall Mount Road on the northern side of Duck Creek will better service this area of Yallah/Marshall Mount. We consider that locating the waste water pipeline along the creekline would allow for gravity assisted discharge, whilst avoiding impact upon developable land.

We request comment from you about planned development servicing for our property as part of this consultation.

If you require further information about this submission please contact by email heather.finch@bigpond.com or phone 42562033.

Regards,
Garry and Heather Finch
