Glenn Snow  
Acting Director  
Infrastructure Projects  
GPO Box 39  
SYDNEY, NSW, 2001

Attention: Toby Philp

Dear Mr Philp

**RE: Environmental Assessment of Flyers Creek Wind farm Project**

After review of the proposal with regards to the impact on Crown land within the project boundary, the following comments are made.

The project boundary is a large area within the Flyer's Creek locality, which totals over 6000 hectares. As such, rather than providing an extensive list of crown land that occurs within the boundary of the project, GIS shapefile records have been provided directly to Aurecon, to include in their investigation.

The Crown Lands Division of DPI contains several Crown road reserves, Crown reserves and Crown waterways that occur within the project boundaries. The Crown land parcels should in no way be impacted or involved in the development of the wind farm without the prior written consent of the Department. Access to or across any of the Crown land will require prior permission.

If you have any queries please call me on 02 6391 4310.

Yours faithfully

Louise Harcombe  
Natural Resource Management  
Project Officer  
Crown Lands Division| Orange
