Mr Toby Phillip

283 Watsons Ln

We bought our property for the views & peace & quiet of the rural area. My partner and I are both retired. We do not want to move from here. If this Wind Farm application is passed it will ruin many lives. We will have to try to sell the property before buyers realise what a big impact the Wind Farm will have on property and life.

N.S.W.

Ref Flyers Creek Wind farm

2798.

Application MPO8-0252

These Turbines are not efficient only 20% to 35% max is produced. The figure 35% is used by Itigen and other companies, which would not be in business only for Government grants - Tax payers money plus the higher price of Electric. We are not against Green Energy if fact we installed solar. After April 28th the 20c per Kilowatt hour cancelled.

Dear Mr Philip

I Strongly Object to the Flyers Creek Wind Farm

My reasons are -

The height of these turbines which we

believe will be 150 meters in height (nearly 500ft)

taller than Sidney Bridge

We are 2.2kms away from these turbine and

40 will be visible from my house (facts supplied

by Itigen).

The noise from the turbines is Major concern also

intersound along with health issues which may

affect us

We have heard that property prices will be

reduced upto 30%

Regards

John Eric Foster
