

FLYERS CREEK WIND TURBINE AWARENESS GROUP INC.

14TH December 2011

Department of Planning & Infrastructure

GPO Box 39

SYDNEY NSW 2001

Dear Sir/Madam,

RE: Flyers Creek Wind Farm MP08_0252

The Flyers Creek Wind Turbine Awareness Group ("FCWTAG") have been approached by community members to prepare a Pro Forma "Letter of Objection" on their behalf, as many people have suggested they would like to be heard but lack the ability to prepare a formal letter.

People feel overwhelmed and upset that they cannot adequately air their concerns or that anyone would actually take any notice of them, and subsequently a form was developed to allow individuals to express their concerns about the development in a simplified manner.

It is hoped that the Department of Planning and Infrastructure will recognize every human being's democratic right to be heard and accept these objections in this format.

No person was coerced or forced to make these objections at any time. This represents the majority of the community's sentiment against the Flyers Creek Wind Farm Development.

Yours sincerely,

Patina Schneider
