

Figure 0.1 FLYERS CREEK LANDSCAPE
Aspect takes in the historic farm, home and shearing shed of “Willow Park”
(refer to Chapter 10)

ACKNOWLEDGEMENTS

The following people contributed or assisted towards this submission on the Environmental Assessment of the Flyers Creek Wind Farm Proposal by Infigen Energy:

Members of the Flyers Creek Wind Turbine Awareness Group and others:

Dr. Colleen Watts OAM (Submission Co-ordinator)
Patina Schneider
Duane Chilcott
Winston Jones
Scott Munro
Di Colman
Ron Burton
Marie Burton
Lyn Suttie
David Coleman
Maureen Coleman
Maureen Campbell
John Foster
John Gerathy
Sam McGuinness
Charlie Arnott

Consultants and Specialist Comment:

Margaret Conn (Solicitor, Mudgee)
Steven Cooper (acoustician)
Les Huson (acoustician)
Dr. Alan Watts OAM
John Schneider
Dr. Sarah Laurie (Waubra Foundation)
Cr. Malcolm Barlow (Upper Lachlan)
Paul Miskelly
Bryan and Karen Lyons (Coopers Gap, Qld)
Bill and Sandy Rogerson (Glenthompson, Vic)

TABLE OF CONTENTS

1	EXPLICIT CAUTIONARY NOTICE	i
2	EXECUTIVE SUMMARY	1
3	STRATEGIC JUSTIFICATION OF THE PROPOSAL	8
3.1	Summary of Objections	9
3.2	Justification and the Public Interest	10
3.2.1	Government's Role and Duty of Care	
3.2.2	Duty of Care regarding children, the elderly and the disabled	
3.2.3	Infigen (Flyers Creek Wind Farm) and its Duty of Care	
3.2.4	The Precautionary principle	
3.3	Justification, Efficiency and Cost Effectiveness	15
3.3.1	Problems of Efficiency and Effectiveness	
3.3.2	Economic Implications of Wind Power	
3.3.3	Specific Comments regarding Flyers Creek Wind Farm proposal	
3.4	Justification and Blayney Shire Council	21
3.6	Land Values	23
4	COMMUNITY CONSULTATION	26
4.1	Summary of Objections	26
4.2	Overall Comment	27
4.3	Introduction	28
4.4	Stakeholders	28
4.4.1	History of the Local Community and Infigen (FCWF)	
4.4.2	Stages of Consultation – one two-day community Information consultation	
4.5	Project Design Changes as a result of Community Feedback	30
4.6	Issues raised during Consultation	30
4.7	Myths of Public Consultation	32
4.8	The Role of Government Employees	33

4.9	Conclusion	34
4.10	Source Material	34
5	NOISE IMPACTS AND HEALTH IMPLICATIONS	36
5.1	Summary of Objections	37
5.2	Noise – Critique of Measurement and Modelling	37
5.2.1	Choice of representative wind turbine model	
5.2.2	Time of Background Noise Monitoring	
5.2.3	Noise Guidelines	
5.2.4	Noise Assessment and Background Noise Monitoring at Flyers Creek	
5.2.5	Problems with FCWF noise data	
5.3	The Acoustic Group (Steven Cooper) Peer Review of Acoustic Assessment FCWF	47
5.3.1	Executive Summary	
5.3.2	Conclusions	
5.4	L. Huson & Associates Review – Noise Impact Assessment prepared for FCEF	50
5.4.1	Executive Summary	
5.4.2	Additional Comments by FCWTAG	
5.5	Health and Audible Sound	54
5.6	Health and Infrasound	56
5.7	Wind Turbines and the Australian Experience	58
5.8	Explanatory Notes	59
6	VISUAL IMPACTS	67
6.1	Summary of Objections	67
6.2	Background Information	68
6.3	Landscape Characterisation	68
6.4	Blade Flicker	69
6.5	Visual Influence	71
6.6	Sub Station	73

7	FLORA AND FAUNA	75
7.1	Summary of Objections	75
7.2	Flora	76
7.3	Fauna (excluding bat fauna)	79
7.4	Bat fauna	82
8	WATER	84
8.1	Summary of Objections	84
8.2	Water supply, surface flows and ground water	84
8.3	Site water demand	85
8.4	Erosion and Sediment Controls	86
8.5	Threats to Water Quality	86
9	TRAFFIC AND TRANSPORT	88
9.1	Summary of Objections	88
9.2	Transport and Traffic Planning	88
9.3	Road Routes to FCWF Wind Turbine Sites	89
9.4	Blayney Shire Council	90
10	INDIGENOUS AND CULTURAL HERITAGE	94
10.1	Summary of Objections	94
10.2	Aboriginal Heritage (Traditional Indigenous Land Use And Cultural Values)	94
10.3	Non Aboriginal Heritage Issues	96
11	CUMULATIVE IMPACTS	100
11.1	Summary of Objections	100
11.2	Cumulative Impacts of Concern	100

11.3	Flyers Creek Environment	101
11.4	Cumulative Impacts – FCWF and Cadia Mine	102
11.5	Cumulative Impact – FCWF and Blayney Wind Farm	103
11.6	Cumulative Impact – Other Industries	103
12	HAZARDS AND RISKS	105
12.1	Summary of Objections	106
12.2	Aviation Safety	106
12.3	Defined Air Traffic Routes	107
12.4	Radar Interference	108
12.5	Bush Fires	109
12.6	Communication Systems	112
12.7	Electric and Magnetic Fields	112
12.8	Geophysical Exploration	113
12.9	Accidents	114
13	DECOMMISSIONING AND WASTE MANAGEMENT	115
13.1	Summary of Objections	115
13.2	Decommissioning	115
	13.2.1 Introduction	
	13.2.2 Overseas Experience of Decommissioning	
	13.2.3 Decommissioning in New South Wales	
	13.2.4 Decommissioning Arrangements for Flyers Creek Wind Farm	
13.3	Waste Management	121
