Hi Michelle,

Following on from the below, Council staff have reviewed the Casuarina Town centre MOD 12 application and have provided the below comment for consideration/clarification;

Planning Comments

Servicing of the allotment

The submitted application requests that services such as water/sewer not be provided to the site as part of any subdivision approval given that they are not currently required for the use as a car park. It is instead requested that a suitable restriction be placed on title.

While the provision of services may not be required at the present time (given the current land use), Council would need the applicant to demonstrate that all services are capable of being provided to the site (including sewer, water, electricity, communications etc.) prior to subdivision approval. A search of Council correspondence on site indicates that there may be difficulty with respect to sewer provision in particular. The development is required to demonstrate that they can lawfully achieve access to all required services including (but not limited to) water, sewer, telecommunication and electricity.

If lawful service provisions can be demonstrated then we could consider a restriction on title alerting future purchases that the site is car park only and would require approval from Council for services to be provided to the Lot.

Alternatively, if lawful access to these services is not available, a restriction to use would need to be placed on any allotment created, restricting any private occupation (dwelling etc.) in perpetuity.

Intent of car parking

A search of both the original application and subsequent Modifications has not clearly identified whether the car parking identified (and subsequently constructed) on proposed Lot 1 is for public or private use as part of the Casuarina Town centre application. The submitted application identifies that the car park is used by the community, however it is not clear whether this is on a private or public basis. Therefore clarification is sought as to the status of the existing car park as per the Major Project Approval. If this is intended as vehicular parking to be open to the public, a restriction of use would need to be applied to any lot created in order to protect this in perpetuity.

Other matters for consideration

- This submitted information appears to indicate that it is a torrens title subdivision, however the subdivision plan (Appendix C of application) is titled as a 'two lot subdivision of Strata Plan 94481 which would indicate a strata subdivision is proposed. Clarification is sought as to the nature of subdivision proposed.
- The submitted application indicates that the original approval and overall intention of the development was for the car park lot to be a separate torrens title allotment, with the Appendix A Subdivision Plan (dated 10/10/2006) submitted in support of this. Clarification is sought as to whether this plan was ever approved in support of the applicant's assertion. A search of records by Council staff does not indicate that this plan was ever approved by the Department of Planning and was instead superseded by an alternate layout through the 'Response to Submissions' assessment of the original application.

Development Engineering Comments

I refer to the above development application to amend development consent DA10/0222 (MP06_0258) and wish to advise that a satisfactory response is required in relation to the following matters:

1. The applicant has referenced a drawing in their appendix A - "Proposed Subdivision Plan dated 10/10/2006 by MLDesign" as an approved plan indicating that the car parking area was a separate lot to that of the medium density lot. All consent approvals do not indicate that this drawing was approved as part of the original consent. Clarification may be required from the applicant where this drawing was approved as part of the consent.

2. As the proposal is for a two lot subdivision it is a requirement that each lot be serviced. There is a possibility that the car parking lot could be used for development of buildings. There has been previous correspondence to Council asking to investigate the possibility to service the car parking Lot.

a) Water - Council's reticulated potable water supply is available to the area. Given the possibility of dwelling construction it is recommended that the developer demonstrate water connection to the proposed car parking parcel Lot 1.

b) Sewer - Council's piped effluent disposal infrastructure is available within the area, however it is not readily accessible for the car parking Lot 1 as the sewer is located some distance away in the form of a 225mm Sewer Trunk Main. Currently there is a previous modification over this site which seeks to relocate this trunk main.

Given the possibility of dwelling construction it is recommended that the developer demonstrate how the site will be connected with sewer to the proposed car parking parcel being Lot 1.

3. The developer to demonstrate all other service provisions can be provided to the car parking Lot 1 such as electricity supply, gas and telecommunication infrastructure, as applicable.

Hi Michelle,

Just checking in on this application, referred to Tweed Shire Council for comment. It is noted that the cut-off for comment is today however I just wanted to advise that Council staff are currently preparing a response which we hope to have with you tomorrow.

Regards

David O'Connell | Town Planner

Subject: FW: Notice of Modification Request - Casuarina Town Centre Project Approval (MP 06_0258 MOD 12)

Hi,

Council has received correspondence from the Department of Planning and Environment in relation to a proposed mod to MP06_0258 (DA10/0222.28) Casuarina Town Centre. The Department are seeking Council's comment in relation to the proposed Mod.

The proposed Mod appears to relate to car park lot (36) located on the eastern side of Casuarina Way (area of 928m²), which was amalgamated by mistake. The applicant is seeking consent to re-instate the lot as a separate lot.

Please provide comments to David and myself.

Regards,

Seth Philbrook B. Urb. and Reg. Plan.

Attention: Troy Green

Attention: General Manager

Tweed Shire Council

tsc@tweed.nsw.gov.au

To whom it may concern,

Please be advised that Planit Consulting, on behalf of CTC Multiple Lots Pty Ltd (the Proponent), has submitted a modification application to modify the Project Approval for MP 06_0258, Casuarina Town Centre.

Tweed Shire Council (Council) is invited to comment on the proposal and provide any recommended conditions.

The proposal seeks approval to subdivide SP 94481 into two separate allotments, to correct an error in the Survey undertaken during works associated with MOD 6 which incorrectly amalgamated a car parking lot and medium density housing lot.

An electronic copy of the proposed modification is attached to this email for your convenience with all other associated documents available on the Department's website at the link below:

http://www.majorprojects.planning.nsw.gov.au/index.pl?action=view_job&job_id=9209

Should the Council wish to make a submission, it should be made to the Department no later than **Tuesday 9 October 2018**. It would be appreciated if you could email your submission directly to me.

Should you wish to discuss any of the above, please contact me on (02) 9274 6272

Kind Regards,

Michelle Niles
