Support

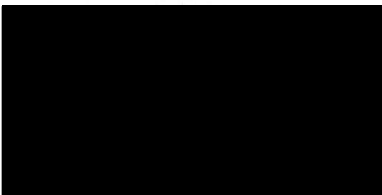

I have lived and worked in the Blayney district since 1992. I have seen several industries come and go in the town of Blayney and have seen the effect this has had on the locals and surrounding communities. I strongly support growth and this development in the town of Blayney, a town I call home.

I can only see this project as a positive for the community with the economic and social benefits it will provide for the district.

The opportunities for the youth of today with professional development and the training that comes with mining should not be overlooked.

The benefits of potential off farm income for our farmers of the district in the current climate may help ease the stresses and assist in the mental wellbeing of our local farming families.

The proposed pipeline for the project is another very exciting factor. Infrastructure with the potential to transfer water from east to west is very exciting.

I have not made any political donations in the last two years.
