Please withhold my name: Yes

McPhillamys Gold Project
Application number SSD-9505

Support: (please provide your statement below)

I strongly support the development of the McPhillamys Gold Project, having been involved in the extensive feasibility drill program I have experienced firsthand the professionalism and stringent protocols adhered to by Regis. Their commitment to the environment, safety and the community has been outstanding. Having had experience with other mining organisations, I have been impressed by the high level of integrity that has been displayed by Regis to date which is second to none.

In the current water crisis, the proposed pipeline offers Blayney and surrounding districts an invaluable piece of infrastructure that can potentially secure water supply to the district from East to West.

The job opportunities for locals in many different fields encourages the development for young people within our community, resulting in the young staying within the district rather than needing to leave to find employment. Providing a flow on effect of a stronger local economy.

I have not made any political donations in the last two years. (If yes please disclose)
