Subject: McPhillamys Gold Project,
Application No. SSD-9505.

As a resident of the Blayney Shire for almost $\frac{3}{4}$ of a century, I understand some of the concerned residents of those living close to the proposed mine site, the extremely vocal & vicious remarks by a few of the Belubula Headwaters Protection Group is quite unbelievable. Maybe it is time they took a cold shower, deep breath, turn around & look at the great benefits for the Shire, business & jobs that this prosperity can bring to all, not the vocal minority.

I have attended community meetings that were held by Regis Resources, Special Project Manager, Tony McPaul has addressed, spoken to & listen to some nasty objections & I have believed that at least 1,000 interviews of their concerns modifying their concerns all which have been included in the Environment Impact Studies Statements.

Summing up I totally believe in the integrity of Regis, their people, & I have spoken to a totally reliable person a previous Newcrest supervisor that he verifies that Tony McPaul is top shelf material having never lie to him.

For this reason I believe McPhillamys Project will be beneficial to all areas of Blayney.

Kind Regards
R Eslick
