Der Sir

I object to the proposed.

1. It will destroy 3000 Ha of grazing land, impossible to restore to what it was
2. Pollution of the soil and river systems.
3. Destroy natural springs in area
4. Lack of water in the area, we are in such a bad way for water as it is.
5. Another nail in the coffin of our home Earth. When are we as a race going to stop destroying our very home.

Yours Faithfully
Peter Judge.

P.S. our record not good.
short term gain long term pain
all the people in the area are
going to suffer a lot.
