I Object to the proposal above mentioned for the following reasons;

- Dust & Air quality due to explosions
- The placing of a Tailings Dam in the Belubular river
- The contaminated water to be piped from Lithgow to be used for multi purposes that will pollute soil & water ways
- Increase in traffic & heavy Vehicles
- The high risk of contamination to existing water supplies
- The destruction of the bees & all that entails at the local honey Bee establishment & surrounding hives, also causing the loss of employment & income of up to 40 workers
- The major devastation & destruction of flora & Fauna that has now also become a refuge for Koalas
- The increased cost to locals due to mining wages Eg: rent
- The close proximity to human settlement & health threats that this brings forth, air toxicity, noise ...
