Please accept my submission to McPhillamys
gold Project SSD-9505

I strongly object to the proposal of this mine

I am a fourth generation resident of
Kings Plains my concerns of the open cut
gold mine are!

- my property is 600 mtrs. from the open pit.
far too close to the mine.
- I am concerned about devaluation of
my property.
- The pollution from the mine site will
be a health concern that will be.
- Dust: drinking water from tanks
air quality eg. lung conditions.
- Water: depleting bore & springs, also
pollution to surface water in
the area.
- Noise: The level will be unbearable.

- View: The landscape will be changed forever, 200 year old Box trees will be destroyed.
- Light: I will have bright lights burning 24 hrs a day 7 days a week.
- Blasting: Will damage ground structure & buildings.

Agricultural land will be destroyed, I managed the 640 acre farm of "Ingledoon" for 15 years & ran 150 breeding cows, which is now McPhillanys Gold Project. I consider this to be definitely the wrong place for a gold mine. What price does Regis & government put on lives & lifestyle.
