20/10/2019.

Attention Director-Transport Assessments,
Coffs harbour bypass SSI _7666

I Object to the Coramba Road Interchange.

IN regards to the interchanges for the bypass you proposed two other interchanges north (Korora) and south (Englands Road) which allow access to the town centre and Industrial area. As the north and south have dual carriageway to the City Centre and the industrial area.

The middle interchange is unnecessary. The Coramba Road and West High Street is a goat's track to the town Centre.

With extra traffic on this road will cause more noise and traffic congestion on a very narrow road, which needs a lot of up grade.

Heavy vehicle should not be allowed to use this interchange if it goes ahead.

I have a house at 2 Tiffany Close and one at 8 Nelson Street, which I live in, both, will be affected by noise and traffic.

It will make the bypass a ring road not a bypass.

Yours truly,

Lauro Spagnolo
