MOOLARBEN COAL PROJECT STAGE I
MODIFICATION 15
APPLICATION NO. 05_0117 MOD 15.

I do not approve of coal mining
nor any extensions of coal mining.

I am interested in the
environment in, which, I live -

Apart from displacing persons and
their livelihood - vegetation & wildlife
areas taken over by mining become
devastated - residents move out - schools
close also businesses.

There is an argument for the
number of jobs mining creates - not
particularly pleasant ones I may say -
but there is also a loss of many local
jobs - Many new jobs will be created
by energy produced by means other than
COAL.

A Better life for all is on the horizon
let us take it - It will be found on
earth not under it.

2.

I am now 88 years old in a nursing home and am unlikely to be making political donations over the last 2 yrs. not now nor at any other time - All savings are directed to my care here -

Coal mines possibly at the top of the government list Nursing Homes at the bottom.

For us all a Better Future.
Margaret Burnett
