Dear Mr Belts

I would like to take this opportunity to
state some of my objections to the proposed
solar plant at Sinderen.

We have lived on our property which
is approx 500^{mts} south of the proposed plant since
1988. Since then we have raised our children
here & entertained family & friends in a
beautiful environment. So this property means
a lot to my family.

Our house that I built as a owner
builder faces north & directly towards the
southern boundary of the solar plant the visual
impact would ruin what has been a lovely
rural setting.

We are also concerned this plant would
have on the environment, The trees in this area are
some of the best examples of red gums & yellow box
that you would find anywhere. The thought of these
beautiful trees on these properties being cut down

②

for a environmental project seems absurd. Having the dams on these properties filled in, soil erosion from water running off the panels + water dispersal from the ground are other concerns we have.

We believe the impact on the community around the ~~Sindera~~ solar plant need to be taken in to consideration. People feel they are losing out financially with the inevitable loss of property values + diminished quality of life, living next to a solar farm (plant). While our neighbours who own these properties but don't live on them are having a large financial gain, we don't think this fallout between neighbours will be repairable if the solar plant goes ahead.

Other concerns we have are the unsightly industrial type fence that will surround it, the build up of hairy panic, other weeds + litter against this fence, the potential increase in fire danger.

Finally we are probably most concerned with a increase in temperature from the radiative heat rising from the panels + heating the air any rising of temperature would make farming our ^{40 HA} property + living here unbearable + would make selling in the future very difficult.

Please don't hesitate to call us on 0438364816 or email sc.brand@live.com.au.
Should you like to contact us.

Thank You.
