To whom it may concern...

I have written to say that I don't like your idea of putting solar-panels farms around the area Jindera, Wala-Wala, Gerogery, etc. Just think of all the businesses you are wrecking. What would happen if it effects drainage? What would happen if it floods? Would it not wreck the solar panels? Why not go and build in the deserts? Its free! and it bearly ever rains!

From a concerned citizen.
