Dept. Planning Industry & Environment

320 Pitt St Sydney

Dear Madam.

I wish to make a submission with regards to a solar farm at Jindera, in Greater Hume Shire near Albury.

My farm overlooks the proposed the site at a distance of approx 6 km. We pass the site regularly doing business in Albury. I have lived in the area all my life 70 odd years.

The area proposed to be under solar panels. will be no more obtrusive to the area than many hobby farms and other land uses. As location to High Voltage power installations, large power lines, stations, and property easements will not be impediments.

Having observed these facilities overseas in Italy Japan China Russia and Southern Europe I do not find them unpalatable to the area.

Australia needs these economical power sources to develop other infrastructure such as Fast Rail (Sydney Melbourne) which use large amounts of Electricity. Clean carbon free power is the answer with solar the most logical. Cheap clean power is essential for all industries.

The Jindera Solar Farm I think answers many needs with not being seriously detrimental to the area.

Yours Sincerely
James Jelbart
