SUBMISSION AGAINST REDEVELOPMENT OF GREENWICH HOSPITAL

97-115 River Road, Greenwich (SSD8699)

I object to the updated development application.

Even though the development has been scaled down I still have issues as follows:-

Traffic and Parking in St Vincents Road and adjoining streets is already at capacity C
urrently there is building at the school in Greenwich Road and the streets are parked out
with tradies. With a more major development it will be impossible to park.

In St Vincents Road this only allows for one lane of traffic at most times and it is difficult
to exit and enter my property.

I am concerned for the many school children that walk up and down Greenwich Road and
River Road every school day and it is already dangerous. They also walk in groups/classes
down to Bob Campbell Oval for Sport.

The entry road is closed between 7pm and 7am weekdays and all weekend. I understand
this was a court order.

The Southern side is covered in heritage trees and during the 25 years I have lived here
always understood from council it could not be built on.

The size of the Development is of great concern as it is surrounded by houses. Every other
Hospital has green space or commercial buildings surrounding them. lly during construction

I have no problem with the upgrade of the Hospital but not to the extent of the
application
