Re: Public Submission for SSD – 7293, Sancrox Quarry Expansion Project

Use this Tick-Box Form or make your submission online by midnight Wednesday 11 December 2019 at <https://www.planningportal.nsw.gov.au/major-projects/project/9946>

Dear Sir/Madam,

I wish to submit my objection to the above development application.

My Name: Stephen E. Cartwright

My Address: 35 Crummer St, Port Macquarie, NSW

My Email: — (Ph. 0429821009)

My objection to the proposal is on the grounds listed in ticked boxes below:

- ☒ The Port Macquarie region is expanding rapidly. This development is in the Sancrox area, approximately 6km west of Port Macquarie, which is undergoing significant residential development that will be directly affected by the increased environmental impact of this quarry expansion.
- ☒ The Sancrox area has already had a substantial increase in noise (24/7), due to the upgrading of the highway to a motorway. Despite noise mitigation measures, the rural ambience is already reduced and any extra noise generation, especially at night, will only make it worse.
- ☒ The proposed 'quarry expansion' is more than that! It also includes two new additional operations, concrete batching and asphalt production. There are already other concrete and asphalt plants in the region that have the capacity to service the demand.
- ☒ The noise impact of a 24 hour, 7 days a week operation is particularly concerning. There will be no respite from constant noisy plant and equipment. Daytime operation excluding Sundays is the maximum that should be allowed in a community precinct. The processes carried out do not have to run at night and can be easily shutdown/restarted.
- ☒ The project includes "clearing 43.1 hectares of native forest vegetation, 0.55 ha of which is identified as the threatened ecological community Subtropical coastal floodplain forest (NR117)" with serious and irreversible environmental impact. (Ref: DA, Annex C)
- ☒ The Greater Sancrox Area Structure Plan (Port Macquarie Hastings Council, 2014), identifies the land to be cleared as medium to high activity koala habitat. More recently the Draft Coastal Koala Plan of Management 2018 (CKPOM) produced by PMHC identifies the area as core koala habitat. The clearing also destroys an identified critical link needed to maintain vegetation connectivity for animal movement.
- ☒ Insufficient field work was conducted in 2015, four years ago. A major flaw of the EIS is that it fails to record koalas at six locations and the presence of habitat critical to the endangered Swift Parrot. (Refs: Office of Environment and Heritage Records, 2008 -2013; Ref. DA Annex C)

- I have not made any reportable political donations in the last two years.*

Date: 28/11/2019
