estimated 350 koalas. Injured and now homeless koalas may have moved onto the proposed

The <u>environmental impact is serious and irreversible</u> . The proposed development site supports unique biodiversity with a total of 27 threatened species identified so far, including 17 birds and 9 mammals, including 7 vunerable microchiropteran bats identified. The native vegetation should be retained to combat Australia's current extinction crisis with some 964 of the 1,250 Australian terrestrial animal species currently listed as 'Threatened'. (Ref. <a href="https://www.environment.nsw.gov.au/topics/animals-and-plants/native-vegetation/why-is-native-vegetation-important">https://www.environment.nsw.gov.au/topics/animals-and-plants/native-vegetation/why-is-native-vegetation-important</a> )
Proposed "Ecosystem credits" system of payment by the developer to offset destruction of threatened species does not compensate for the <u>serious and irreversible impact</u> on the natural environment.
Native vegetation in NSW stores a significant amount of carbon. This deforestation and forest degradation will contribute to global greenhouse gas emissions and fewer trees in a region can contribute to drought by reducing the amount of local rainfall.
The natural water on the site, currently supporting native flora and fauna, will be diverted to industrial use and North and west alluvial flood plains of the Hastings River and Haydons Creek will be impacted.
The company operating this site has a poor track record of environmental compliance and were fined \$15,000 by the Environmental Protection Authority in 2016 for breaches to water their water management operational obligations. (Ref: EPA 24.03.2016).
The proposed works impact Aboriginal heritage sites, including a Scar Tree and ceremonial site of "high cultural significance." (Ref: Annex D, Heritage Report)
Increased quarry trucks movement 24 hours a day 7 days will effect local road safety.
I have made no reportable political donations in the last two years.
Signed: M J . On Date: 22/11/2019
I AGREE to the Department publishing my submission on its website in accordance with The Department of Planning, Industry and Environment Privacy Policy.
☐ I DO NOT agree to the Department publishing my submission on its website in accordance with The Department of Planning, Industry and Environment Privacy Policy
