Submission Document

Attention: Director - Coal and Quarry Assessments Planning and Assessment Department of Planning, Industry and Environment GPO Box 39, Sydney NSW 2001

Ke: I	Public Submission for SSD – 7293, Sancrox Quarry Expansion Project.	
	ir/Madam, to submit my obiection to the above development application.	
My Na	ame: _	
My Address		
My o	bjection to the proposal is on the grounds listed in ticked boxes below:	
6kı	e Port Macquarie region is expanding rapidly. This development is in the Sancrox area, approximately movest of Port Macquarie, which is undergoing significant residential development that will be ectly affected by the increased environmental impact of this quarry expansion.	
hig me	e Sancrox area has already had a substantial increase in noise (24/7), due to the upgrading of the hway to a motorway. You only have to ask anyone living in the area that, despite noise mitigation asures, the rural ambience is already reduced and any extra noise generation, especially at night, will y make it worse.	
con	e proposed 'quarry expansion' is more than that! It also includes two new additional operations, acrete batching and asphalt production. There are already other concrete and asphalt plants in the ion that have the capacity to service the demand.	
that	e noise impact of a 24 hour, 7 days a week operation is particularly concerning. There will be no pite from constant noisy plant and equipment. Daytime operation excluding Sundays is the maximum a should be allowed in a community precinct. The processes carried out do not have to run at night can be easily shutdown/restarted. Give us A BREAK, 24/7 is AN AMBIT	
the	e project includes "clearing 43.1 hectares of native forest vegetation, 0.55 ha of which is identified as threatened ecological community Subtropical coastal floodplain forest (NR117)" with serious and versible environmental impact. (Ref: DA, Annex C)	
land "cri elin Ann The	e Greater Sancrox Area Structure Plan (Port Macquarie Hastings Shire Council, 2014), identifies the d to be cleared as medium to high activity koala habitat. The clearing also destroys an identified itical link and vegetation connectivity in the immediate, and the Greater Sancrox Structure Plan, minating traverses by animals south-north through the centre of the Development Site". (Ref: DA, mex C) THE PROTECTION IS NO KOALAS IN NSUBY 2050. Biodiversity Assessment Report (DA, Annex C) was based on insufficient field work conducted in 5, four years ago. Current, independent and comprehensive field surveys are required to validate the ort.	

The State of Emergency declared in NSW due to the catastrophic bushfires in November 2019 killed an

KOALAS SHOULD TAKE PRECEDENCE OVER THE GREED OF

estimated 350 koalas. Injured and now homeless koalas may have moved onto the proposed

development site.

SOME INDIVIDUALS.

biodiversity with a total of 27 threatened species identified including 7 vunerable microchiropteran bats identified	tified so far, including 17 birds and 9 mammals,
