Sydney, NSW

Dear Sir,

HES Investments does not support the proposed time extension for the Marulan Gas Fired Power Stations.

Reasons:

HES Investments Pty Ltd is the owner of 'Tea Tree Hollow', a short term holiday rental house, which Energy Australia has marked on its map, 'Figure 6 Land use'. The directors do not support the proposed time line extension for the following reason:

The 40-acre property is marketed as an eco friendly rural retreat It has solar power, tank water, bush walking tracks. Wildlife abounds. Building two gas fired power stations practically next door to 'Tea Tree Hollow' will completely ruin the concept of a rural getaway, due to the noise from the plants, the polluted air and possible contamination of Wollondilly River. Not to mention the impact on local wildlife, especially birdlife as was made evident from the original environmental impact study.

We, the above mentioned directors, declare that HES Investments have not made and reportable political donations.

We have read and accept the Terms of Privacy.
