

Submission for: Walla Walla Solar Farm

Supports

Brolga Hotel Motel

COLEAMBALLY, New South Wales

Message

As a business that was impacted by the Neon Coleambally Solar Farm in 2018. I believe a project like this is greatly beneficial to local businesses surrounding solar farms that are being built in the area. The Colembally Solar Farm had a duration of 6-8 months period which seen an revenue injected into the township of Coleambally, the hotel itself saw on average increase of 70-80 meals being cooked on a daily basis at night, with also an increase in bar sales, bottleshop sales and other areas of the hotel. This created extra roles in the hotel during the construction of the Solar farm and money being spent in employing local people.

Even after the completion of the Solar Farm project we have 6-8 Solar Farm workers regular visit the hotel for many reason, such as food, beverage and accommodation. This is a great example of continue support of a multinational company supporting small communities and giving back to the region.
