Dear Anna, Neville

Thank you for the opportunity for GMC to comment on the above project. As requested, a copy of the Environmental Assessment has been made available for public viewing in GMC's foyer.

It is noted that the project falls wholly within Upper Lachlan shire Council although the transportation route during construction does pass through this Council. This matter is only dealt with superficially. Section 2.5.2 of the Traffic Impact Assessment by URS refers to the route through Goulburn as the "Goulburn Bypass" however this route is not specified. If the route involves the right turn from Old Sydney Road into Union Street, then this would pose problems for oversized vehicles.

It is recommended that further discussion and details of the construction traffic be discussed with Council officers including Council's Principal Development Engineer, Mr Ian Aldridge.

For further information, please contact me as per details below.

Regards,

Richard Davies
Manager Development Control
