Dear Director, Infrastructure Projects

Re: Application number: SSD 5066/EPBC 2011/6086

As a resident of the South West Region of Sydney, I write to register my strong opposition to the location of the proposed intermodal freight terminal at Moorebank.

This multi-million dollar prime riverside land would be better used to house up to 40,000 people and alleviate Sydney's growing housing crisis. As it stands, the recent PAC decision means that the Intermodal cannot operate at planned capacity. It would also necessitate substantial upgrades to the existing transport links, which would be extremely disruptive. Instead, the new Intermodal should be located at the new Badgery's Creek airport, where it can be profitable from its first day of operation, has the capacity to expand and will be a true intermodal for road, rail and air.

I urge you to act and make the right decision for the South West Region and the Australian people - build the new Intermodal at Badgery's Creek.

James Saba
