Subject: SIMTA MODIFICATION – SSD 5066 [Early Works]

I object to these modifications, on merit and on principle because the project is to take trucks off the road now it will put 12000 trucks and cars on the road per day. This is just the start of a project that will be a white elephant and waste taxpayers money and cause traffic conjecture in the area.

Building a project having access by one road and over 15000 traffic movements per day is not logical. The true cost of the project is hidden as investors will be coned into investing into a white elephant. Is this then legal giving out false information. How many more modifications will be allowed by the department of planning.

Yours sincerely,
Robert Storey
