**Subject:** SIMTA MODIFICATION – SSD 5066 [Early Works]

I object to these modifications, on merit and on principle because...

SIMTA is seeking to modify the scope of the Early Remediation Works for which they previously received approval by adding the much larger "river side" MICL (Government) project [est 200ha+] into their smaller project [est 80ha+] without filing a new application. These proposed works are much larger and extremely significant by comparison to the previous early works approval. The nature of the new works also assumes future approvals of stages not yet reached or applied for. More than a decade after this intermodal project surfaced and not one single Development Application has been presented. There is significant risk to public health risk as well as associated traffic and environmental impacts. The whole entire proposal requires much closer scrutiny

Yours sincerely,

Julia Scutella

Australia
