Subject: SIMTA MODIFICATION – SSD 5066 [Early Works]

I object to these modifications, on merit and on principle because the company should have known about these requirements and submitted the information along with the original plans. This additional work is even worse than the original proposal. No one is considering the health and safety of those who have lived in the area for many years. The traffic congestion and noise.

Living 1km from this site I am now very concerned about the additional works. Apart from the noise and eye sore of containers being stored 6 high they are now asking for the site to be built up with tonnes of material coming from who knows where. Does this mean the site will then sit higher than the surrounding area which will contribute to more noise, 24 hr lighting and the site being in total view. This has to be stopped and moved to a more suitable area like Baggerys creek which was not approved when the initial submissions were made. Why build up a community just to pull it down and destroy it with a massive industrial area right in the middle of people's homes. The roads and bridges can't handle the extra loads. Whose paying? Traffic is already at capacity. Can the current storm water systems accommodate the additional run of this built up area will cause. What affect does it cause the surrounding housing.

Seriously this needs to be stopped and moved to a suitable industrial area that is not already homes to thousands of families and kids.

Yours sincerely,
Tracy Noble
