Subject: SIMTA MODIFICATION – SSD 5066 [Early Works]

I object to these modifications, on merit and on principle because I do not believe that it is the best infrastructure that could be used for Sydney, instead it is a poorly designed stop gap measure.

I am concerned that it is being built so close to existing housing, with a substantial increase in both air pollution and noise pollution likely. With this in mind, it is concerning that business needs are being put ahead of the health and wellbeing of residents already in place.

I am disappointed that despite strong community objections that this plan has been moving forward. It signals to me that we have many levels of government not demonstrating foresight, accountability or a sustainable future for our area.

Yours sincerely,
Stephanie Foster
