**Subject:** SIMTA MODIFICATION – SSD 5066 [Early Works]

I object to these modifications, on merit and on principle because of the impact it will have on the local environment and subsequently on my health. I work locally and already experience traffic gridlock. You are planning excessive additional traffic movements, I say the word movement sarcastically, because it will mean being stationary for a long time. Increased dust particles, thanks for that I already suffer from asthma and this will exacerbate that problem. It looks like I will have to sit inside, with doors and windows closed, because of the additional noise and just keep the air conditioner running. This is so different to my current outdoors lifestyle, where I love spending time in my beautiful suburb, walking, exercising and relaxing. We do not want the SIMTA or any of the modifications that you are now adding

Yours sincerely,  
Katrina England
