Dear Chris

Re: Enirgi Battery Recycling Facility Modification. Application SSD-6619-Mod-1 Lot 1 DP 850711, Lot 21 SP 1128492 & Lot 3 DP 594679

Thank you for your invitation on 27 November 2019 to provide comment on the above proposed facility upgrade and construction.

Local Land Services sincerely apologises for not providing our comments by the due date of 16 December 2019 but we trust you will still accept this late submission.

The Bomen Industrial precinct encompassing the Livestock Marketing facility and is an area where Local Land Services does have permitted travelling stock in the local area intermittently.

The prime concern to this proposal for Local Land Services is for the need to ensure that batteries being recycled and manufactured at the facility are contained within the perimeter of the site with suitable secure fencing and that adequate control measures are in place and are adhered, to ensure travelling stock are not able to come in contact with batteries regardless of their condition.

Calcification deposits on batteries and the lead within them are a mineral attraction to cattle in which they lick them. This is known to cause lead poisoning and can result in extreme illness or sudden death.

If you require any further information or concerns please contact Peter Beal, Team Leader, Travelling Stock Reserves (TSRs), Riverina Local Land Services on mobile 0428 968249 or email: peter.beal@lls.nsw.gov.au

We thank you for considering our concern to this development.

Yours sincerely

Ray Willis
Acting General Manager
