Record Number: DOC2020/0242853

Dear Ms Munk,

Thank you for the opportunity to comment on the Environmental Impact Statement (EIS) for the Mount Piper Energy Recovery Project (SSD-8294). NSW Health makes the following suggestion for your consideration.

NSW Health assumes that air quality assessment was performed in accordance with NSW Environment Protection Agency (EPA)'s "Approved methods for modelling and assessment of air pollutants in New South Wales".

While the methodology and assumptions used in the human health risk assessment is consistent with enHealth guidance, an independent review of both air quality impact assessment and human health risk assessment is requested as these technologies are novel in the Australian context.

Regards

Dr Richard Broome
