Dear Sir/Madam

Objection to the Culcairn Solar Farm – SSD-10288

I am concerned that this is an industrial development on prime agricultural land.

It is not a suitable development for land zoned RU1 in Greater Hume Shire.

I am extremely concerned about fire risk and accessibility to contain and combat fires. My understanding is that the development site is dangerous to enter due to toxic fumes, electrocution and entrapment.

I would suggest that this development be directed to land type similar to that of the Woomera Rocket Range that has arid unproductive land.

I recently travelled from NSW to South Australia to Central Australia and the of Greater Hume had the highest quality agricultural land within approximately 3000kms.

Tubestock trees are no comparison to the environmental value of 99 established paddock trees.

Developments such as this threaten endangered wildlife and vulnerable species.

I have great concern that there may be future impacts such as chemical leaching that could effect the environment and our waterways.

I have not made any reportable political donations in the previous two years

Yours faithfully

Rob Lubke
