RE: Application Culcairn Solar Farm  
No: SSD-10288

I object to this project.

The reason I object is because this area has proven itself as some of the most reliable prime agricultural land. The solar plant should be built in less populated low value land areas. The mental stress and depression caused to neighbouring farmers and households will be too much for many to cope with and will ruin their lives and livelihood.

I have never made a political donation in the past.
