Dear Sir/Madam

I wish to make the following objections to the proposed building of the Culcairn Solar Farm,
Application Number SSD-10288. The Reasons being.....

1. My objection of prime agricultural land in a consistent and safe rainfall area being set aside for uses other than the production of food and fibre.
2. I am led to believe from various meetings that the present managers of the existing High Voltage Transmission Line indicate that it is at full capacity of transmission, meaning there is no capacity for extra generated electricity to be transmitted into this system.
3. This would mean the proposed Solar Farm would be idle most of the time. What a repugnant waste!
4. The suggested life of the panels are 25 years, after which who is left with the huge monetary cost of demolishing and recycling the residue, plus restoring the land back to its former production levels? Has this even been considered?
5. I object to the community enticements that are offered, they suggest a very hollow, baseless project demonstrating corruption shown by misleading marketing. Agricultural lands have been bled enough in the name of progress, is this yet another?

Yours sincerely
Max Scheetz
