15986782 Proposed Culcairn Solar Farm

I wish to make a submission against the proposed solar farm at Culcairn NSW on the grounds that no solar farms should be built on agricultural farming land. This farming land in the Riverina has safe rainfall and is a sustainable cropping area. While much of the whole country is in shocking drought this area is excellent cropping and hay making country.

Solar farms need to be built on arid dry land not good reliable agricultural country.

If there is no power grid lines in the dry arid land further west then the government needs to build one. Solar farms are going to be necessary and there needs to be a planned approach for the future.

I have made no political donations

Yours sincerely
