Dear Madam

Re: Clyde Waste Transfer Terminal DA 205-08-01 MOD 5

Our property is located at 35 Parramatta Road, Clyde, northwest of the Clyde Waste Transfer Terminal site, and we wish to strongly object to the proposed expansion of the facilities at the waste transfer terminal and the removal of the need for a community consultative committee.

We have owned this property since May 2000 so we have significant history in this area. Prior to the opening of the Clyde Waste Transfer Terminal we were never impacted by offensive odours. This is certainly now the case and seems to be an ongoing problem. If the terminal cannot manage its existing odour issues now then how can it manage with a 20% increase in waste input at the site. The current issue of offensive odours coming from the site, we believe, should be addressed, before any increase at all is even considered, in order for the waste transfer terminal to comply with its existing approval.

As the waste transfer site greatly impacts a large area of surrounding neighbours it should be imperative to have a community consultative committee. We have never been invited to be part of this process and after discussions with our neighbours nor have they. We would like to see this process enforced to give all the surrounding neighbours, who are greatly impacted, the ability to have such consultations.

We look forward to receiving further advice regarding this prior to the development application being determined.

Yours faithfully

PETER HEFFERNAN

Property Owner
