Subject: Angus place coal mine

Dear Minister

Please do not approve the resumption of coal mining at Angus Place colliery. The Newnes plateau creeks and swamps are beautiful and should be protected.

If Mt Piper power station has to continue the steaming coal should be sourced from the mines at Ulan (who already rail coal to Hunter Valley power stations and export). I understand the required rail links were put in place a longtime ago to allow this.

Can we please have a Gardens of Stone National Park preserving this lovely area.
