

Objection to State Significant Project – Angus Place Coal Mine Extension - SSD 5602

Dear Madam/Sir,

I object to the Angus Place Coal Mine Extension, and request that the Department of Planning, Industry and Environment (DoPIE) recommend refusal of consent. Centennial Coal's Angus Place proposal would be disastrous for NSW both because it will exacerbate the climate emergency and destroy and degrade NSW's precious natural heritage, including nationally endangered swamps. Further, I wish to raise the following specific matters for consideration:

I oppose the mine extension as it will fracture and drain nationally endangered swamps. Centennial Coal admits that subsidence-related impacts are expected at Tri-Star Swamp, Twin Gully Swamp, Trail Six Swamp, Birds Rock Swamp, Crocodile Swamp and hanging swamps in their catchments. These swamps are home to vulnerable and endangered species such as the Blue Mountains Water Skink, Giant Burrowing Frog and the Giant Dragonfly.

In the recent bushfire season, wildlife and bushland was devastated. The bush was dried out by an extended drought and then scorched in extreme heat which is becoming more common. In this context, these swamps are critical refuges and natural firebreaks and more precious than ever. Centennial coal has destroyed enough swamps on the Newnes Plateau.

It's time to protect, rehabilitate and recover these threatened ecological communities, not destroy more. I oppose the mine extension as it will worsen the climate emergency. Global heating is having devastating impacts on people and nature in NSW and around the world. The climate emergency has been caused by many small emissions which add up to a huge global problem. The only way to solve it is to begin closing down these emissions sources one-by-one and rejecting approval of new ones, such as this mine.

Centennial Coal mis-reported its downstream (scope 3) CO₂ emissions as being 30 times smaller than in reality. In reality, this project would be responsible for 11 million tonnes of CO₂ each year, a whopping 8.5% of NSW's CO₂ emissions, while Centennial claim the number is only 0.368% of NSW's emissions. Centennial fail to account for the impacts of these emissions. The climate impacts such as sea-level rise and associated flooding, longer and more extreme fire seasons, heatwaves, coral bleaching, ocean acidification and increased disease spread must be properly estimated and quantified.

I request that if any consent is issued, then it must be reviewed every 5 years with a possibility of cancellation from 2025, to enable future NSW Governments to end coal-fired electric power as soon as possible and so help stop the growing climate catastrophe. Approval to 2053 is certainly in breach of the NSW government's net zero emissions by 2050 target. Approval beyond 2030 is in breach of Australia's commitment to the Paris agreement goals of making efforts to limit global heating to 1.5 degrees.

Please require Centennial Coal to revise this amended proposal to prevent damage to spectacular Birds Rock, pagodas, cliffs and the nationally endangered swamps in the 2,000 hectare proposed mining area. DoPIE must not allow Centennial Coal to replicate under this proposal the damage it has already caused to nationally threatened upland swamps on the Newnes Plateau.

If mining is to be approved in this environmentally sensitive area, mini-longwall mining methods should be applied instead of the intensive longwall mining proposed to protect this significant part of the Gardens of Stone reserve proposal. The Wolgan Falls must not run dry and so the proposed

longwall mining panels along the Wolgan River side of the proposed mining area must be shortened by hundreds of metres to prevent river water losses due to far field impacts associated with the extensive Wolgan Lineament Field. DoPIE must require that pristine Carne Creek, and its waters that flow through the Greater Blue Mountains World Heritage Area and past the Wolgan Valley resort not be contaminated with iron and manganese or suffer reduced flows due to fracturing of surface rocks. In the seven years since Centennial's consultants identified the need for targeted surveys of four nationally endangered plants, the company failed to undertake these searches.

Lithgow Environment Group has in that time identified many sites where these Federally listed plants occur within the proposal, highlighting the weakness of the company's environmental assessment.

For all the above reasons, the amended mine extension proposal must be subject to Independent Planning Commission review processes.

I have not made political donations or gifts totalling \$1,000 or more in the last two years. I provide my consent for the contents of my submission including my name and postcode to be published and listed by the Department.

Yours sincerely,

See names listed below.
