

## SSD 10431

### Objection to Stage 3

The above DA for compound worker accommodation, car parking hardstand, road construction, drainage the importation of 280,000 unconsolidated and 540,000 structural fill, the subdivision and creation of nine allotments for terminal and warehousing purposes.

This will have enormous consequences for local residents Including dust as well as for the safety of road users during construction. Road use due to the pandemic will be saturated and adding massive construction trucks is putting road users at risk

I am also concerned that as legal proceedings to Stage 2 are underway , it is premature and not proper process to be determining Stage 3
