FW: Submission re Project SSI - 10038 (Sydney Metro West)

This my Submission:

I write to you as a resident of Callan Street in Rozelle with regard Sydney Metro West (a project I support, despite the fact that WestConnex's insane spaghetti-junction tunnelling appears to have scuppered any chance of us having a Metro stop on Darling Street).

As a community we have **campaigned** against WestConnex and **for public transport** since July 2016.

Over the past year our street has been ripped up and repaired more times than I can remember.

Our already-tired and beleaguered community is reeling from the constant (often 24/7) assault of WCX's heavy earth-moving equipment/rock hammers/dust/noise.

Just last week (with COVID-19 concerns gradually lifting and kiddie-sport resuming in four days) our street became the *only access* to King George Park.

Callan Street is a modest, 2.9 metre-wide 10km/hr SHARED ZONE. Traffic levels have already increased, and threaten to be totally intolerable within days, for at least a year.

Callan Street can take no more.

I implore you to **find another route for the Sydney Metro electricity cabling works proposed for Callan Street** over the next 18 months... works which would once more disrupt our once-quiet and safe neighbourhood.

Put simply, my family and I - and those of every neighbour I know - have had enough.

Thank you.

David
