

11 June 2020

Attention: Jonathan Kerr of Department of Planning and Infrastructure

**SOUTHWEST METRO UPGRADE: CITY OF CANTERBURY BANKSTOWN
FEEDBACK TO THE MODIFICATION 1 BANKSTOWN STATION**

Dear Jonathan Kerr

Please find attached feedback for the Modification Bankstown Station.

Council notes that the feedback is consistent with our previous correspondence dated 6 February 2020 as sent to Jon Lamonte, CEO Southwest Metro. The letter identified priority changes for each of the stations. In particular, at Bankstown, the letter identified upgrade of the intersection of North Terrace and The Appian Way which has not been included in the Modification request.

Council wants to ensure that future improvements to Bankstown Station and surrounds improve the experience and safety for both Metro customers and the broader community. At this stage we feel there are still several opportunities where an improved outcome can be achieved to the benefit of all and should be included in scope and delivered as part of the current Metro Southwest project by 2024.

Please do not hesitate to contact me to discuss further if required.

Regards

Valerie Giammarco
Manager, City Design
