

27th June 2020

The Secretary
NSW Department of Planning, Industry and Environment
4 Parramatta Square
12 Darcy Street
Parramatta NSW 2150

Dear Sir

**RE: SSD 10376 Sydney Metro Pitt Street (South) Over the Station Development –
Stage 2 and SSD 8876 MOD 2**

I OBJECT to the above proposed development applications.

I live in the Princeton Apartments and have looked at how close the proposed new building will be to our apartment.

I have looked at the plans and the reports and am disgusted that the government would allow another building to be built so close that it would block out all of the sun to our apartment in the coldest part of the year.

Not only will you block sun access to my living room, the building will be so close that I will have no privacy.

I also OBJECT to further overshadowing of Hyde Park from this development. We do not have much open space in the city and as such treasure Hyde Park and the sun we get in winter months. To further overshadow this Heritage Park is a disgrace.

The impact of this new development being so close and blocking out the sun and providing no privacy will have a significant on our mental health and wellbeing.

Regards
