NSW Dept Planning

Re proposal Weston Aluminium (DA-86-04-01-MOD)

I/We oppose any modification to the conditions of the dress plant as we are 500 metres downwind & uphill of this facility & have to put up with odours & airborne pollution mostly at night.

It has been stated that the nearest home is 600 metres away, wrong they are from 160 metres. We are next to a school with app 700 students, they will also be affected. Spent potlining is nasty stuff & should not be processed so close to residents. Basically Weston Aluminium is in the wrong place for all it's operations. I know I am wasting my time writing a letter of objection, as locals tell me as the proponent will get anything they want. In the beginning we had hundreds of people protest in the park, hundreds of names on petitions, all to no avail. We have to keep doors & windows shut often because of the pollution already, so adding to it will make it worse. Please reject this proposal for the sake of residents. This also goes for (DA-86-04-010-MOD 11 and LEC 10397 of 1995-MOD-9)
