**Tritton Copper Mine MOD6 (ML1544) – State Significant Development – Secretary's
Environmental Assessment Requirements**

Dear Rose-Anne

I refer to your email of 7 September 2018 requesting the Resources Regulator review the supporting Environmental Assessment requirements for the above project.

The project represents a modification of the original Development Consent (DA 41/98) approved by the NSW Minister for Planning on 1 September 1999.

The Resources Regulator has reviewed the Environmental Assessment and determined that no further input is required.

Should you require any further information please contact me on 02 4063 6444.

Yours sincerely

Matthew Newton
Director Compliance Operations
NSW Resources Regulator
