SUBMISSION TO MAJOR PROJECT
ssd 12469087
GUNLAKE QUARRY CONTINUATION PROJECT

I am writing this submission in support of this project, and as President of the Marulan Region Chamber of Commerce, I have seen the transformation this industry has had on our village with employment, new residents, increase in property values, and with financial support from the industry in enabling various groups to hold events which bring the community together.

Gunlake have proved to be excellent corporate citizens, and have shown great respect for the community in their consideration of truck movements, road safety and their ability to always listen to concerns that may occur by residents.

This extension to the Quarry will be done with all of the above considerations uppermost in the company's mind, and our members are in total agreement with the benefits this will bring to our village.

David Humphreys
President
Marulan Region Chamber
of Commerce
