

Application: Sydney Football Stadium Redevelopment Concept and Stage1 Works - Modification 6 - Inclusion of Precinct Village and Carpark Building Envelope and Sydney Football Stadium Stage 2 (Construction and Operation) Modification 7 (SSD-9835-Mod-7) 40-44 Driver Avenue, Moore Park

Providing comment: I support the inclusion of landscaping on top of the carpark and in the area around the Stadium.

I do not give political donations. I live nearby and I support the welfare of the natural environment.

My comment: It is imperative that the existing trees on the periphery of this development along Driver Avenue and Moore Park Road NOT be removed or DAMAGED in any way - not the canopy and not the ROOTS. Excavation of the site must respect these trees and the new landscaping needs to include low grasses and greenery right across to the surrounding pedestrian footpaths of these streets. Up to a few years ago there was greenery there but it was brutally removed by a front-end loader causing possible damage to roots. Please do NOT take this as an excuse for removing trees now. Look after them.

I enthusiastically support the proposed landscaping of the roof of the carpark. It must also be MAINTAINED by the 'football' custodians. There is no such thing as a no-maintenance urban landscape.
