In relation to the application (SSD 5589-2012)

I object to the proposal listed above.

I own an apartment that looks over the site, and the noise we have experienced from this site on former occasions, when it has been used as a function centre and food and drink premises is hardly acceptable in a residential area. We have heavy duty doors to the balconies, but the voices/**music**/and cars leaving the site, as the noise carries upwards, is the problem. Nobody cares.

Kind Regards,
[REDACTED]
